

Explain why you chose the website, how it influenced your designs, and what kind of transition the website used.

<https://www.taylorswift.com/>

- I chose this website because we talked about a Taylor Swift concert website in class and I decided to reference it. It influenced my design because of its header and logo design and how it has an image and text side by side. This website has a column drop for its title and top image and its navigation menu becomes a hamburger menu when the width is smaller.

<https://www.nickiminajofficial.com/>

- I chose this website because it is the same artist that I am doing for my website. It influenced my design in terms of the color scheme, using an iframe for twitter, to include a form, and some of the images. This website drops all columns and minimizes images when the width is smaller.

<https://pitbullmusic.com/>

- I chose this website because my friends and I are fans of Pitbull. It influenced my design because I chose to use images and text across the width of the screens for some objects. This website hides some images when the width is smaller.
